EDUCATION

Universitat Politècnica de València

2023-2028

- Double Degree in Mathematics & Business Administration
- Expected Grade: First Class Honors

Cambridge House British International School

2021-2023

- A levels → Mathematics, Physics, Business and Spanish Literature. (AAAA)
- 9 IGCSE's | 7 A*'s | 1 A | 1 B

WORK EXPERIENCE

GPTadvisor - B2B company offering a SaaS solution that leverages the latest gen-AI technology to enhance wealth management and advisory workflows

Institutional Sales & Business Development

June 2025-Sep 2025

- Developed and implemented a global high-ticket (100,000€) sales strategy by targeting multiple levels of seniority within client organizations, improving outreach efficiency and conversion potential.
- Supported end-to-end sales cycle including prospecting, qualifying leads, booking meetings, and sitting in on negotiations with financial institutions.

Wealth Management AI Intern

May 2024-Sep 2024

- By presenting to the senior management team, I enhanced my presentation and communication skills
- Optimized AI prompts to obtain better model performance for clients like Santander, Bankinter, Indexa etc. Successfully reduced the AI's average response time by 5 seconds, improving user experience.
- Managed extensive financial data sets containing over 70,000 investment instruments, including bonds, stocks, and indexes. Focused on creating client-centric 'Focus Lists,' enabling each firm to optimize their product offerings, thereby enhancing value for clients.

Financial Advisor for Crypto Projects

2021-2023

Provided strategic guidance on fund allocation for diverse crypto projects, facilitating the establishment of meaningful connections and resulting in total sales volume of over US\$ 1,000,000 on the SOL/ETH blockchains.

- Team worked with people from all over Europe, America and Asia overcoming language barriers
- Worked in a highly dynamic market, that required fast learning and frequent adaptations to trends in the market
- Innovated on how to expend funds to build +5 successful projects, and managed balance sheets in Excel
- Strategized to solve upcoming issues that span multiple departments (Ex. Managed a team of developers, assigning tasks based on each programmer's specialization (web2/web3))

EXTRACURRICULAR

UPV Investment Club

May 2024 – Present

- Led the organisation of the first McKinsey & Company workshop at my university, attended by 100+ students, featuring a consulting case study and expert consulting tips. ([LinkedIn Post](#))
- Options Risk Modelling Project: Built a Black-Scholes pricing and Monte Carlo simulation tool to analyse option risk. Developed heatmaps to visualize Greeks' sensitivities and pricing behaviour. ([Web App](#))
- Conducted a comparative analysis of [implied vs. realized volatility](#) for SP500 and Bitcoin (2014–2024), leveraging historical data and statistical modelling to assess market behaviour and option trading insights.
- Performed a quantitative study of Delta in options pricing, analyzing its role in hedging, exploring Taylor approximations, and simulating Delta vs. Delta+Gamma hedging strategies. ([Link](#))

JP Morgan Investment Banking Virtual Simulation

Identified an ideal M&A target for a client by assessing strategic and financial criteria. Built a DCF model to value the target, accounting for factors like competitor bids and supply chain disruptions. Created a client-ready 2-page summary, detailing the company profile and auction process.
